**Civil & Infrastructure Services**

AlMarooj is a company of experienced engineering professionals.

We support developer and government clients in the provision of civil engineering investigation and design for a wide range of projects.

Subdivisions lot, street & drainage layouts  
Access & car parks including roads, roundabouts, drive-ways

Utility & services design coordination

Investigative coordination including survey, geotechnical, structural & groundwater

AlMarooj provides comprehensive site engineering services from planning through design, permitting, and construction. From initial regulatory approvals to final build-out.

Our expertise in a diverse range of specialized areas, including site selection and utilization, feasibility studies, utilities assessment, site/civil engineering design and permitting, complements and supports other disciplines. AlMarooj is team oriented, which gives us the opportunity to work on multiple aspects of very complicated assignments.

AlMarooj provides services for the following facilities:

Oil & Gas facilities  
Commercial and retail  
Educational facilities

## Pipeline Services

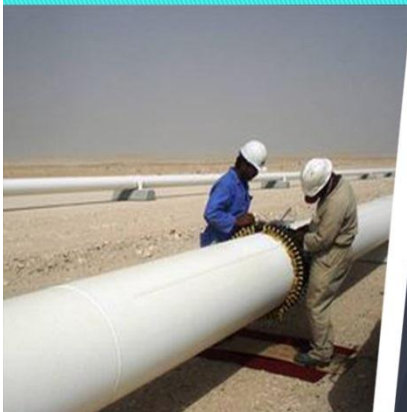

AlMarooj

Al Marooj much more than just a name it's  
a success story ... and story is still going on

AlMarooj is a complete pipeline construction and maintenance contractor. We offer a full service package from excavation of the ditch through backfill of completed pipeline of any diameter complete with final grading. We also offer full double joint service, resulting in a large reduction in on-site welding and delivering faster, safer and more cost effective construction techniques.

To maintain existing pipelines, AlMarooj offers full pipeline integrity services where we can locate weak spots in the line, Pipe rotating, shutdown, bolt-ups and torquing services are also provided to maintain pipeline assets.

#### Pipeline Services

- Pipeline construction
- Pipeline earthworks
- Pipeline integrity management
- Pipeline maintenance
- Offsite material management and double jointing

Welding & Fabricating Service

AlMarooj

Al Marooj much more than just a name it's  
a success story ... and story is still going on

AlMarooj utilises the latest fabrication and welding techniques to engineer components and structures in a wide range of metals. Our welders are highly qualified and have long experience.

Approved Fabrication and Welding

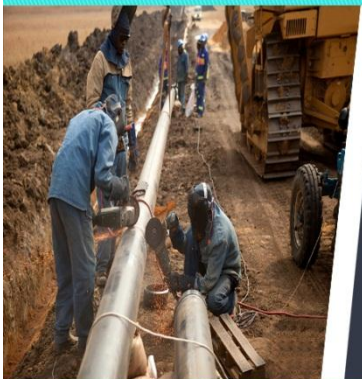

Multi-discipline, class approved, on site welding offers clients a range of specialist skills ensuring high integrity welding processes. Each welder is regularly audited to ensure conformance to numerous specifications and standards. A dedicated fabrication and welding area ensures no cross contamination between ferrous and non-ferrous materials.

AlMarooj can move your project through the fabrication process smoothly and efficiently. All of the companies we service demand fast, reliable fabrication and erection services and they receive exactly what they expect.

Our services include, but are not limited to, full service fabrication and installation of process piping, oil and gas fabrication, and structural steel. We also offer in-house drawings, pipe supports, and skid units.

AlMarooj is a full service fabricator and installer of process piping and structural steel for oil and gas and various other industries. Unlike most fabricators or erectors, we provide both services. We have found that combining the two services is more cost efficient than separating them.

## Workover & Well Servicing

Al Marooj much more than just a name it's  
a success story ... and story is still going on

AlMarooj offers its onshore integrated workover services to local oil and gas companies primarily in Yemen.

A workover is the process of maintaining, repairing or enhancing production from a well through various means. Most workovers require the production tubing string to be pulled from the well by the workover rig in order to repair the defects that may be causing sub-optimal well production. The production tubing is inserted back into the well once the defects have been repaired. In some cases, a workover is performed in order to carry out hydrofracking and acidizing.

The following are common workover tasks that we perform.

**Subsurface pumping.** Subsurface pumps are required. These pumps have a finite life and are routinely replaced.

**Remedial cementing.** Frequently, cementing operations are carried out on existing wells to shut off water or unwanted gas production.

**Tubing replacement.** Most workovers require the production tubing string to be pulled from the well. As a result, production tubing needs to be replaced as part of the workover process.

**Well cleanout.** This entails the removal of debris, sand, scale and organic materials from a well to improve the flow of hydrocarbons to the surface. Many reservoirs produce sand that is not carried to surface by the flow of hydrocarbons during production. The resulting accumulations can decrease production and are cleaned out periodically.

**Additional perforations or re-perforation.** In certain oilfields it is possible to perforate additional intervals in hydrocarbon bearing reservoirs to increase production rates. In other reservoirs it may be possible to re-perforate an existing perforated interval that has become closed. New technologies also allow for deeper penetrating perforating charges

## Drilling Services

AlMarooj

Al Marooj much more than just a name it's  
a success story ... and story is still going on

AlMarooj offers an expansive inventory of specialized tools for drilling activities. We design, rent and/or sell tools based on the specific project needs of our clients.

Our Drilling service includes temporary onshore accommodation modules and accessories, as well as downhole drilling tools, such as tubulars (primary drill pipe strings, landing strings, completion tubulars and associated accessories), and bottom hole tools (stabilizers, non-magnetic drill collars, and hole openers).

Offerings include:

Accommodations

Bottom Hole Assemblies

Inspection Services

Premium Drill Pipe

Specialty Equipment & Rentals

## Heavy Trucking Service

### Rig Moving

AlMarooj is an industry provider in rig moving with a team of dedicated staff ensuring every aspect of the move is done safely and in compliance with all regulations and protocols. Coordination is completed through pre-planning routes, applying for and receiving permits, conducting hazard assessments and lease conditions. Our team has the equipment and expertise to get the job done safely and efficiently.

### Pipeline Hauling

AlMarooj has a diverse range of equipment that allows us to haul any diameter or length of pipe. Assigning drivers, transportation supervisors and equipment required to complete the job safely and efficiently.

### Heavy Hauling

From the heaviest equipment to the largest modules, construction equipment, AlMarooj's experienced team can haul it. We have a diverse range of trailers and staff who are experienced in the logistics but also the rules and regulations of the specialized transportation industry.
